DETAILED ACTION

Allowable Subject Matter

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 6, 7 and 12, the primary reason for allowance is the limitation in the claim defining that the first capacitance is formed by arranging (i) a first bus line that is on an active matrix substrate and that is not shared for use with another active matrix substrate and (ii) a line other than the second bus lines to cross each other, which is not found singularly or in combination within the prior art.

The closest prior art reference is Goto et al. (US 2004/0021616), which teaches of two active matrix substrates which share some bus lines and that the bus lines that are not shared have a capacitance formed by providing a capacitance adjustment means. Goto et al., however, fail to teach that the capacitance adjustment means forms the capacitance by crossing a first bus line that is on an active matrix substrate and that is not shared for use with another active matrix substrate and a line other than the second bus lines.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
